

# HEALY PHYSICAL THERAPY & SPORTS MEDICINE, INC.

## Coronavirus/COVID-19 Enhanced Staff & Patient Safety Measures

Healy Physical Therapy's top priority is ensuring a safe environment for our staff and our patients. We remain committed to being open to service the needs of our patients. We have been closely monitoring the latest news reports regarding COVID-19 (Coronavirus) and are following all precautions and policies recommended by the CDC and the RI Department of Health.

We have implemented the following enhanced protocols to protect our staff and patients from the spread of COVID-19:

- All treatment tables, mats and any equipment used by a patient must be immediately cleaned once that patient is finished before another patient can use it.
- All waiting rooms and bathrooms chair rails, door handles (front and back), toilet handles and paper towel handles will be cleaned regularly throughout the day.
- All Clinics are cleaned daily.
- All treatment room tables are disinfected after every patient.
- All employees must wash their hands after treating any patient for at least 20 seconds.
- All employees must sanitize their hands after receiving anything from a patient.
- All work stations must be disinfected after each employee use.

Based on the current COVID-19 threat, we ask that you NOT come to the clinic if:

- 1) You are at higher risk of developing more serious illness from COVID-19.
- 2) You currently have a fever, cough, chills, and shortness of breath, body aches, or any other flu-like symptoms.
- 3) You have returned from international travel in the past 14 days.
- 4) You have had close contact with or exposure to an individual with confirmed or suspected COVID-19.

We will continue to monitor developments and work with you to find the best and safest solutions to maintain your physical therapy care plan. We appreciate the privilege of having you as our patient and look forward to continuing to serve you!

In Health,

Dr. Michael P. Healy, PT, DPT  
President
